- **High Load retention**
- **EXTENDED Stroke**

Titan Technologies International, Inc. a worldwide leader in bolting products and services announces a new generation of SUB SEA Hydraulic Bolt Tensioners. The Titan-Technofast HydraJac™ SUB SEA System.

The Titan-Technofast **HydraJac Spring Retract** SUB SEA Tensioners give positive return of the hydraulic piston. They do not rely on the use of an additional pump system or the efficiency of seal arrangements, thus providing **simple and very reliable** operation. and saves **Valuable DIVE TIME**.

The **Patented Tri-Nut** expands more than competitive technology, providing for easier installation. The Tri-Nut is **retained to the Load Cell / Bridge** through a retaining groove. The complete tool can be easily maneuvered into position, at depth. The **Cam-Lock System** makes for easy install and removal at depth.
